

GETSPACE

Getting your people
back to work. Safely.
The future of work has arrived.
Book your seat.

iOCO

Workspaces are becoming agile.

Remote work was already increasing.
43% of the global workforce was
expected to be mobile by 2022¹

With 70% of teams having a remote
workforce component by 2028²

And then, Coronavirus.
Now over 70% of people already work
remotely at least some of the time.

That's a lot of wasted office space.
At least half of workspaces are unused
at any given time, but still consume 30%
of a building's energy.

Getting employees back to work safely.

GetSpace is a space planning, demand, and occupancy management solution that lets you get your people back into the office safely, and manage your corporate real estate to a new level of accuracy.

Ensure that only healthy employees are able to enter the office, drive down building management costs, and deliver an agile user experience that lets people work where, how, and when they want to – now and in the future.

At GetSpace we believe in creating safe and healthy workplaces that enable collaboration and innovation.

That's why we've created a new way to manage your teams and buildings. And we have a feeling that on-demand workspaces are the future of workforce management.

A smarter way to manage your corporate real estate.

Handle all your space requirements, from bookings and occupancy management, to access and maintenance support.

Covid management

- Ensure only healthy employees can access the office

- Check-in functionality
- Guest access requesting

This is not your usual office.

Book anything, with dynamic digital workspace management from GetSpace. Easily manage and allocate individual parking bays, hot desks, and meeting rooms.

- ✓ **Ensure the health of your in-office staff**
Enable daily health checks and go/no-go decisions for staff, before they leave for the office.
- ✓ **Real-time COVID risk management**
Understand the health risks of your people, so you can make better decisions around your workforce.
- ✓ **Track space utilisation**
Understand how people engage with their workspace and use accurate data to meet their needs today and in future.
- ✓ **Real-time dashboards and reporting**
Drill down to uncover insights in occupancy, utilisation, costs, security, maintenance, and more.
- ✓ **Granular access control**
Know who's coming and going with digital access permits and time restrictions.
- ✓ **Enable real estate charge out**
Commercialise every workspace and meeting room; unlock new revenue streams.
- ✓ **Real-time occupation management**
Support walk-ins and in-app bookings. Scale workspace capacity according to health and safety regulations.
- ✓ **Compliant and secure**
Know who was at the office when someone else was sick. Easily integrates with existing security and access management systems.
- ✓ **Healthy buildings, happy people**
Occupancy data optimises maintenance and sanitisation schedules.

A smarter way to manage your corporate real estate.

1

User completes a health check in.

Immediate Go/No-Go decision for the employee based on their health status.

2

User books their seat.

User may only book and go to the office if they are healthy.

3

GetSpace generates permit.

GetSpace checks occupancy limit as well as the user's health check before issuing.

4

Permit Deactivates.

No confirmed health check. No valid booking. No access.

Get your people back to work safely.
