

Remote Collaboration with Amazon Web Services

Solving for COVID-19, Together.

Solution overview

We are moving into a new-normal, a remote-first world. We need to empower for employees to work remotely and collaboratively in a secure environment from home or anywhere in the world; with full access to business data, apps and systems as if they were in the office.

Our goal is to help companies rapidly roll out full digital workspaces for their end users, consolidating each individual's app and database needs into a single platform, delivered as a secure remote desktop.

When you deploy End User Computing on AWS, you can:

FLEXIBLE, DIGITAL DESKTOPS FOR REMOTE PRODUCTIVITY AND COLLABORATION

- 1 Ideal for businesses of any size dependent on legacy apps that might not be cloud-ready.
- 2 Use apps as if on-premises and take advantage of cloud, accessible via desktop, mobile or web browser.
- 3 Easy provisioning of desktops; simply choose the package that meets the number of workspaces you require.

Amazon WorkSpaces for secure access to the office, from home.

Give your users a fast, responsive desktop of their choice, accessible from any supported device.

BUSINESS BENEFITS

-  Simplify desktop delivery
-  Control desktop resources
-  Flexible desktop OS deployment
-  Reduce costs
-  Keep data secure

Amazon WorkDocs lets your people work together.

Fully managed, secure content creation, storage and collaboration service, zero upfront fees or commitments.

iOCO is ready to help organisations overcome the challenges of COVID-19 with secure, managed workspaces on demand. We can roll out full digital workspaces for end users, consolidating each individual's app and database needs into a single platform, delivered as a secure remote desktop.

BUSINESS BENEFITS

Secure your content in the cloud

Collaborate efficiently in real time

Bring your content into apps and processes

Reduce costs with flexible pricing

iOCO has achieved Amazon Web Services (AWS) End User Computing (EUC) Competency status – one of the first AWS Partner Network (APN) Partners in Sub-Saharan Africa to do so.

Recognition that we provide deep expertise in supporting customers that need to provision, protect, and gather intelligence from end-point devices, end-user apps, and data on AWS.

We're ready to help enable your remote workforce securely, efficiently and cost-effectively.

We are announcing two new offers that enable your business to deploy Amazon WorkSpaces and Amazon WorkDocs for up to 50 users at zero charge before 30 June 2020, available immediately.

Both offers are for customers new to these services. The Amazon WorkSpaces offer includes our Standard, Value, and Performance bundles.
