

Enabling scale, fast.

Retail solutions with fast-track Kubernetes

Solving for COVID-19, Together.
SOLUTION OVERVIEW

Are you a digital essential services provider that's struggling to meet customer demand? We want to help.

We'll scale out your cloud-native application and have you operating through your new online digital channels within 48 hours.

THE CHALLENGES ARE REAL ...

- Customers moving to online digital channels which struggle to scale, causing poor customer experience and lost revenue
- Ensuring that applications can handle the additional load during lockdown
- Providing business the relevant data for quick, informed decisions
- Needing to move out of on-premise data centers to the cloud and the additional help to run applications in the cloud
- Wanting to run and operate applications in the cloud as well as on-premise (hybrid) using the same technology and practices
- Ensuring applications are designed to handle cloud-native scale

... BUT WE HAVE YOU COVERED

Don't worry if you don't have in-house skills or if you're operating out of on-premise data centres. We'll provide everything you need to operate effectively in the cloud, including:

- 1 Containerisation & Microservices expertise
- 2 Priority onboarding
- 3 Dashboards
- 4 Reporting

Using a technology stack comprising the Kubernetes containerisation platform and cloud and open source technologies, we'll help you to scale fast, so you can serve your customers better, manage more traffic, and help South Africa through this difficult time – on-premise or in the cloud.

Create a container platform based on Kubernetes ready for workloads within 24 hours either on premise or in the cloud. Contact us now.
