

Streamline collaboration Infor Supplier Exchange

Solving for COVID-19, Together.

Solution Overview

Infor Supplier Exchange streamlines and accelerates your online collaboration with suppliers throughout the world. With Infor ION's unique event and workflow management combined with the sleek, efficient new user interface, you'll get more done faster and get better performance from every part of your supply chain.

BUSINESS BENEFITS

Infor Supplier Exchange supports online collaboration between manufacturing companies up and down the supply chain, including logistics service providers, outside processors, purchase parts suppliers, and discrete purchase order suppliers. Infor Supplier Exchange is especially valuable to manufacturers who need better visibility into their entire ecosystem through seamless online collaboration.

Get support for multiple replenishment methods.

Extend your ERP systems with integrated supply chain management.

Deploy "pull" replenishment methodologies, including Kanban or SMI.

Bring disparate ERP systems to a common platform with data from all customer sites presented in the same format.

Standardize business processes and systems so that you can display all supply information from all sources on a single platform.

Cut costs and improve performance.

Not just order exchange – Supplier Exchange is a complete solution that also includes advanced real-time replenishment with suppliers and information to help you review supplier performance.

Smaller manufacturers or suppliers don't always use EDI and therefore miss out on the benefits of real-time ordering and information exchange.
