

# Monitor & Manage Workforce Health

## Solving for COVID-19, Together.

### Solution overview

The number of people in South Africa diagnosed with COVID-19 is on the rise. Awareness is critical to combat the spread of this virus and to determine whether employees have been tested and have acquired COVID-19 or not. Digitalisation of this information is key to be able to assess and track the status of all employees and to protect those that have come into contact with the virus or have contracted the virus. It is important to flatten the rate of infection and get South Africa back to work as soon as it is feasible.

### SOLUTION OVERVIEW

- Monitor Covid-19 Status of your employees
- Identify other people that may be at risk
- Automatically remind employees
- Captured data digitally to provide accurate and immediate assessment
- Assess employees' Covid-19 status continuously
