

Cloud Accounting

IFRS 16 Lease Accounting

Solving for COVID-19, Together.

Solution overview

Concluding month-end, interim and year-end accounting process through a collaborative cloud platform.

The movement restrictions that have come about as a result of the COVID-19 Pandemic now, more than ever, require sound digital collaboration across different finance functions.

The restrictions may further complicate compliance to an already complex standard that has a huge impact on a company's financial position especially where multiple leases are being accounted for.

Our cloud based IFRS 16 Lease Accounting solution offers automated Lease Accounting that allows you to easily manage volumes of leasing data by providing data collection, calculations, reporting and disclosures on a single cloud-based and collaborative platform across multiple business entities.

At a time such as this, where finance teams are having to work apart and from their different home locations, due to the measures taken around the Covid-19 Pandemic, CCH Tagetik provides a relevant cloud based platform for Finance teams to conduct their financial close.

This platform is collaborative and also consolidates financial reporting across multiple entities, automatically, all on a single unified platform.

With rich consolidation intelligence, CCH Tagetik takes care of complexity so organisations can accelerate the close and consolidation process across all their business entities.

BUSINESS BENEFITS

A comprehensive solution suited to handle all the complexity associated with compliance to the new IFRS 16 Standard

On premise. On cloud. One solution. With CCH Tagetik, the choice is yours!
