

# Business Continuity

Back-up, high availability and disaster recovery

## Solving for COVID-19, Together.

### Solution overview

You've already lost valuable time to the lockdown. Don't lose your data too.

Trust your business-critical information to Arcserve, an industry proven, all-in-one disaster recovery and backup solution that lets you scale up, down, and out to the cloud – on demand.

Delivering every data protection capability your business needs through a single, simple management console, Arcserve protects your systems and applications in cloud, virtual, and physical environments.

### BUSINESS BENEFITS

Unify your backup and disaster recovery strategy into a single solution and benefit from:

High availability

Reduced costs

Less complexity

Sophos ransomware protection

Email archiving compliance support

Backup for legacy and tape environments
